COURSEWORK

UNDERGRADUATE
Object Oriented Programming
Analysis and Design of Algorithms
Data Structures
Operating Systems
Computer Networks

SKILLS

PROGRAMMING
• C++ • C • Javascript

TOOLS
• Git • Github • Windows • MySQL

FRAMEWORK
• React

TECHNOLOGIES
• HTML • CSS • SQL

OTHERS
• Football • Music • VideoGames

PROJECTS

NETFLIX-CLONE | ReactJs,Sass

- This is a clone of Netflix website built using Reactjs for Front-end.
- It was created with React.js and CSS and React-Router.
- It uses The TheMovieDB Api to search for movies and display detail.
- It features similar UI as the official Netflix platform with custom slider for mutliple movie items in a row.
- Link: Netflix

WEATHER APP | Reactjs ,HTML , CSS

- Created a weather website which takes a input as city name and shows the current weather condition of the particular city.
- It uses OpenWeatherMap Api for fetching data and display it in the site.
- Link: Weather

TODO APP | Reactjs ,HTML , CSS

- Created a todo app which lets u add and delete a particular task .
- Link: MyTodoApp

PORTFOLIO SITE | Reactjs ,SASS, HTML

- Created a frontend portfolio website that also features 3D models.
- Implemented mail feature using Emailjs library.
- Link: Portfolio

EXPERIENCE

HACKVERSE - HACKATHON
- Built The front-end site for the Hackverse hackathon.
- It was a blockchain based Hackathon where we built a website where a user can mint a nft. The nft was based on spirograph.

ACHIEVEMENTS

- 200+ problems on Leetcode
- 3* at Codechef
